

When looking for help with your job or career, what's the hardest thing to find?

# Leaders and Experts

So how do you identify those exceptional and generous individuals willing to share what they know with eager recipients?

## Mentor Match Services

The Marine Corps collaborated with the Department of the Navy to establish an **online directory of Mentors and Mentees** to make it **easier for individuals to find and make a connection with a leader or subject matter expert** willing to take time to share their knowledge and experience. By using the new Mentor Match Services, your skills and experience are used to assist in finding others that would benefit from your mentorship.

Throughout the year, we are **asking those individuals willing to mentor others to sign up**. That way when **we open the service to mentees**, matches should generate more quickly.

This is **your chance** to add to mission capability or develop the next senior leader. **To learn more** about how to enroll and use the Mentor Match Services, **go to:**
