ENVIRONMENTAL POLICY**

The natural environment is an essential asset to the mission of Marine Corps Installations Pacific (MCIPAC). MCIPAC's policy is to support mission accomplishment by incorporating environmental compliance, efficient natural resources management practices, and the interests of the local community into mission execution. We will always strive to protect and preserve the land, water, air, and cultural resources under our responsibility by doing the following:

- Complying with Final Governing Standards and applicable laws, regulations, and policy
- Implementing pollution prevention through reduction and recycling
- Conserving natural resources and preserving cultural resources
- Implementing sustainability initiatives
- Conducting appropriate review of potential environmental impacts of all Federal actions

Operational readiness is the hallmark of the Marine Corps, and environmental compliance is key to sustaining and enhancing mission readiness and access to training environments. MCIPAC is committed to promoting responsible stewardship while improving environmental performance through an effective and efficient Environmental Management System (EMS).
