

## CAMP MUJUK ENVIRONMENTAL POLICY

The natural environment is an essential asset to the mission of Marine Corps Installation Camp Mujuk. As a Team, Camp Mujuk, will ensure that we accomplish our mission by incorporating environmental compliance, efficient natural resources management practices, and the interests of the local community into mission execution. Camp Mujuk will always strive to protect and preserve the land, water, air, and cultural resources under our responsibility by doing all of the following:

- Complying with Final Governing Standards and applicable laws, regulations, and policy
- Implementing pollution prevention through reduction and recycling
- Providing personnel awareness of their environmental responsibilities
- Conserving natural resources and preserving cultural resources
- Implementing sustainability initiatives
- Conducting appropriate review of potential environmental impacts of all Federal actions

Operational readiness is the hallmark of the Marine Corps, and environmental compliance is key to sustaining and enhancing mission readiness and access to training environments. Camp Mujuk is committed to promoting responsible stewardship while improving environmental performance through an effective and efficient Environmental Management System. As a Team, we will reinforce these concepts with our training units to ensure that the United States Marine Corps is viewed as a steward of the Republic of Korea's natural resources.

Semper Fidelis,

R. D. MICHAEL  
COLONEL, U.S. MARINE CORPS  
COMMANDING OFFICER, CAMP MUJUK, ROK
